

X-ENVIROSHRINK™ MULTI-PACKING COLLATION FILM

Developed by RPC bpi protec, X-EnviroShrink is a 100% recyclable shrink film that contains up to 75% recycled content, making it fully in line with the latest proposals for plastic packaging and one of the most sustainable solutions for the multi-packing of goods.

Available in both plain and printed versions X-EnviroShrink is the ideal collation shrink for a wide variety of products and markets, from beverage cans and bottles to canned food and cartons.

Typical Applications

- Beverage cans
- Beverage bottles
- Canned food & goods
- Cartons
- Milk bottles

Substrate material

- Mono PE

Making a Difference in Everyday Use

- Plain
- HD print
- Unique numbering
- Single or multi-line format

100% recyclable in existing PE waste streams such as supermarket carrier bag collection points.

Recycled content - contains up to 75% recycled content

Ultra-low carbon footprint - using the Sustane recycled polymer from RPC bpi recycled products.

HD print - use of HD plates produces high quality print for brand enhancement, whilst reducing the number of colours required.
